MISSOULA--

Dr. Fred Shafizadeh, professor of chemistry and director of the Wood Chemistry Laboratory at the University of Montana, will present a paper entitled "Thermal Conversion of Biomass" at the second national symposium of Research Applied to National Needs (RANN), a program of the National Science Foundation.

The symposium, known as RANN 2, will be Nov. 7-9 in Washington, D.C.

Shafizadeh will present his paper during a roundtable discussion on Monday, Nov. 8. The paper deals with the conversion of wood and cellulose residues into sugar and chemicals by use of heat.

One of the main objectives of RANN is to stimulate the current and potential RANN communities to consider the emerging and long-term needs of the nation.
